PAWSITIVE NEWS

Monthly Newsletter from Pawsitive Vet Care

NEW VEHICLE

We have a new vehicle with a lot more space so will now be able to assist with transporting pets that need hospitalisation.
Many conditions can be treated at home so we can come to assess your pet and then, if hospitalisation is needed, assist you to get them to the best place.

LUNGWORM

With nearly 3000 cases of lungworm being reported in the last 12 months, it is concerning that only a third of owners have treated their dog against this potentially fatal parasite. Monthly treatment is needed and this can only be obtained with a veterinary prescription. Please contact us for a full parasite risk assessment for your pet.

AGE AMNESTY

It can be very difficult to get insurance for older pets as many companies will not take on new policies for pets over the age of 8. Agria are waiving their upper age limit on policies taken out in October and November so your pet can be protected with a lifetime policy. Visit http://bit.ly/2nXS3S9 to sign up.

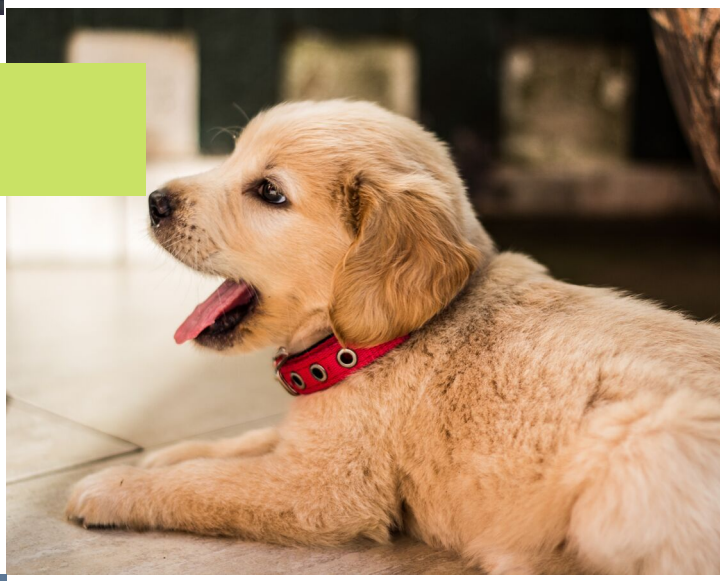
FIREWORKS

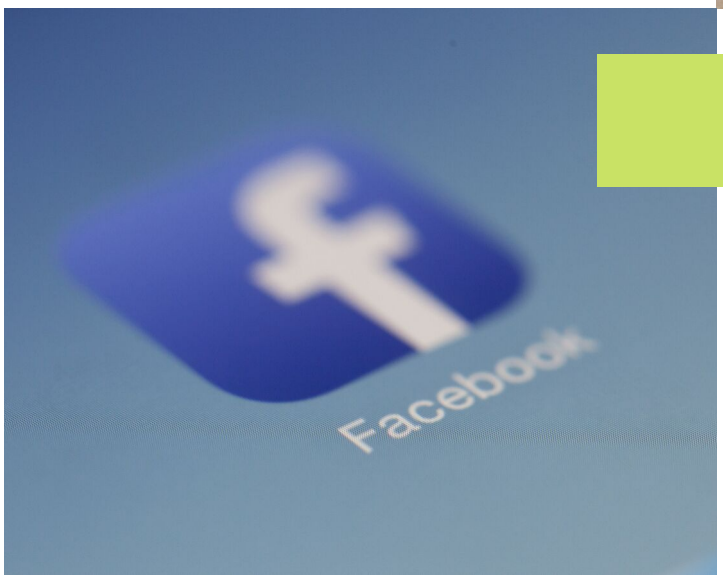
Firework season is fast approaching. Many animals find this time of year especially stressful. Noise phobias are very common and generally get worse if not dealt with.

If your pet finds firework season particularly scary, please contact us for a behavioural assessment and advice. More general information can be found on our Pawsitive Pet Care website - visit http://bit.ly/2pzxqMi

PUPPIES

We are offering a free Kong toy for all puppies receiving a vaccination from us while stocks last. We recommend a final vaccination after the age of 16 weeks to ensure full protection. Puppies will also receive up to 4 free of charge weight and growth checks.





FOLLOW US!

We have now reached over 200 Likes on Facebook! If you are not already, please like and follow us for regular updates on our service and content about general pet care. We can also be found on Twitter and Instagram @VetPawsitive. Please also share with your friends!
