Monthly Newsletter from Pawsitive Vet Care

PARASITES SPOTLIGHT

Parasites are not just unpleasant, they can cause deadly diseases, some of which just affect our pets, while some can affect us as well. From the 16th November we will be focusing on these pests on our social media posts. Please follow us to find out more! Our social media handle is @VetPawsitive on Facebook, Twitter and Instagram.

PUPPIES AND KITTENS

Puppies and kittens grow fast! This is Lottie the Cockerpoo in June, and in November. Regular growth checks when they are young can help to prevent obesity when they are older. To promote this, we offer free of charge weight checks for puppies and kittens who have their initial vaccinations with us.

AGE AMNESTY

It can be very difficult to get insurance for older pets as many companies will not take on new policies for pets over the age of 8. Agria are waiving their upper age limit on policies taken out until the end of November so your pet can be protected with a lifetime policy. Visit <http://bit.ly/2nXS3S9> to sign up.

DIABETES

November is Pet Diabetes Awareness Month. Did you know that dogs and cats can suffer from diabetes, just like we can. The most common first sign of diabetes is an increase in thirst. Other conditions can also cause this but all need investigating. If your pet seems more thirsty than they used to, book a visit today.

The earlier treatment is started, the better.

OUT AND ABOUT

We will be having a stall at various dog shows and Christmas Fairs over the next few weeks so keep an eye out for us and pop over to say hello!

FOLLOW US!

We have over 200 Likes on Facebook! If you are not already, please like and follow us for regular updates on our service and content about general pet care. We can also be found on Twitter and Instagram @VetPawsitive. Please also share with your friends!
