

# PAWSITIVE NEWS

Monthly Newsletter from Pawsitive Vet Care

## HAPPY NEW YEAR!

We hope that you and your pets had a lovely time over Christmas and are ready for all that 2020 will bring. We are very excited at Pawsitive Vet Care as we have some great new developments in the pipeline - keep your eyes and ears open!

## HEALTH CARE

As the old adage goes, "Prevention is better than cure". Regular health checks, good nutrition and weight checks, dental care, regular parasite control and vaccinations are really important to keep your pets happy and healthy. We will shortly be launching a new way to spread the cost of preventative healthcare so watch this space!

## FIREWORK PHOBIAS

Did your pet get scared of the fireworks over New Year? Firework phobias are very common in dogs and can get worse if not treated. Now that firework season is over, this is the best time to start desensitising your dog to reduce problems in the future. Contact us for an assessment and personalised advice.

## NEW YEAR, NEW PET?

Planning to start the year with a new family member? Make sure you make the right decision with our pre-purchase consultation.

This will help you to choose the right type of pet for your lifestyle and give advice on choosing the right breeder or rescue pet.

Seeking advice before getting your new companion can save a lot of financial and emotional heartache in the future.

Visit our website <http://bit.ly/2ZV3Kr7> for more details.

## KEEP CATS SAFE

Cats like to spend time outdoors but this can put them at risk of poisoning and being hit by cars. Keep them safely contained in your garden with a cat fence from ProtectaPet. Get £50 off any spend of £400 or more by using the promo code PAWSITIVE. Visit [www.protectapet.com](http://www.protectapet.com).
