Monthly Newsletter from Pawsitive Vet Care

## RABBITS NEED JABS

Rabbits are creatures who are very prone to stress, which can cause illness. However, it is also very important to protect them with vaccinations against fatal diseases such as myxomatosis and Rabbit Haemorrhagic Disease (RHD). A home visit is a great way to provide protection without the stress of a vet visit.

## VETS DELIVER

Never forget your pet's important parasite control medications again. Our new VetsDeliver service ensures that you receive your pet's treatments at regular intervals delivered directly to your door. VetsDeliver is available as a stand-alone option, or as part of our Healthy Pet Clubs.

**Deliver** VETS  
**from your vet, to your door.**

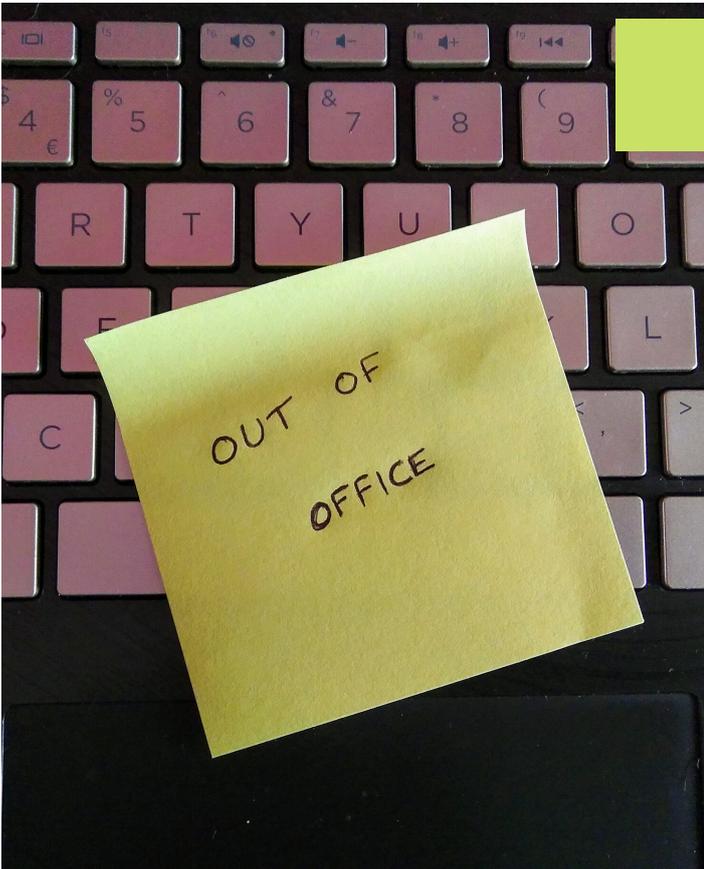

## CORONAVIRUS

If you are suffering from a respiratory illness, or are self-isolating due to a possible coronavirus contact, please let us know prior to arranging a house visit for your pet. We may be able to arrange an alternative option, such as a video consultation. For up to date information about pets and coronavirus, visit <http://bit.ly/vetcorona>.

## SERVICE UPDATE

Helen will be on annual leave from the 20th to the 30th of March so will be unavailable for visits or repeat prescriptions during this time. If your pet is on long-term medication, please ensure that you have sufficient supply, or place a new order by Monday 16th March.

During this time, if you have any urgent health concerns with your pet, please contact Medivet Leamington Guy on 01926 423161, or you can book an appointment for my return via the website [www.pawsitivevetcare.co.uk](http://www.pawsitivevetcare.co.uk).

## PETSAPP

Many of you have signed up to PetsApp, our new messaging facility. If you have not yet downloaded the app, please email us to ask for a link, or download the app on your phone and select Pawsitive Vet Care. You can then message us or book a video consultation.

## FOLLOW US!

If you are not already, please like and follow us for regular updates on our service and content about general pet care. We can also be found on Twitter, Instagram and LinkedIn @VetPawsitive. Please also share with your friends!
